1 Objective

The production of a video was planned to enhance the public awareness for the CETIEB project and its thematic fields.

2 Procedure

According to the Description of Work the video was expected after 12 months project duration, but no suitable material was available at that time. Therefore the deadline for Deliverable D8.5 was shifted to the end of the project.

3 Realisation

The video was realized at the University of Stuttgart and at the demonstration site Richard-von-Weizsäcker School in Öhringen, Germany.

A low resolution web version is available for download at the CETIEB homepage www.cetieb.eu under “Download”. A high resolution version and a DVD will be provided to the project partners and the European Commission.
